GOVERNMENT OF MEGHALAYA

**AREA, PRODUCTION AND YIELD
of
PRINCIPAL CROPS
in
MEGHALAYA
(1987-88 to 1998-99)**

VOLUME – II

*Directorate of Economics & Statistics
Shillong*

Preface

Meghalaya Agriculture Statistics presents key statistical data pertaining to Area, Production and yield of principal crops of the State. This publication is the first of its kind published by this Directorate with an intention to serve as a handy compendium for data on State Agriculture. The tables in this first series of the Publication are based on the information according to State Crop Forecast Reports approved by the State level committee for each year.

The detailed work relating to the preparation of this issue is under the programme of the Agriculture Statistics Section of the Directorate under the supervision of the different section Officers-in-charge, Deputy Director- Shri A. Marbaniang and Shri K. Kamraju, Research Officer- Shri J.D Shira, Shri E.G. Momin and Shri A. B. Laloo. I would like to place a record my deep appreciation of the handwork put in by Shri S. Das, Statistical Officer and concerned staff of the section.

(W. L. Lyngdoh)
DIRECTOR
Economics & Statistics
Meghalaya, Shillong.

Table No.	Contents	Page No.
1	Area, Production and Yield of Autumn Rice (Ahu) from 1987-88	4
2	Area, Production and Yield of Winter Rice (Sali) from 1987-88	5
3	Area, Production and Yield of Spring Rice (Boro) from 1987-88	6
4	Total Rice from 1987-88	7
5	Area, Production and Yield of Wheat from 1987-88	8
6	Area, Production and Yield of Maize from 1987-88	9
7	Area, Production and Yield of Gram from 1987-88	10
8	Area, Production and Yield of Tur (Arhar) from 1987-88	11
9	Area, Production and Yield of Rabi & other Pulses from 1987-88	12
10	Area, Production and Yield of Other Cereals and Small Millets from 1987-88	13
11	Total Food grains from 1987-88	14
12	Area, Production and Yield of Sesamum from 1987-88	15
13	Area, Production and Yield of Castor from 1987-88	16
14	Area, Production and Yield of Rapeseed & Mustard from 1987-88	17
15	Area, Production and Yield of Jute from 1987-88	18
16	Area, Production and Yield of Mesta from 1987-88	19
17	Area, Production and Yield of Cotton (Fiber) from 1987-88	20
18	Area, Production and Yield of Sugarcane from 1987-88	21
19	Area, Production and Yield of Chillies (Dry) from 1987-88	22
20	Area, Production and Yield of Tobacco from 1987-88	23
21	Area, Production and Yield of Turmeric (Green) from 1987-88	24
22	Area, Production and Yield of Banana from 1987-88	25
23	Area, Production and Yield of Potato from 1987-88	26
24	Area, Production and Yield of Sweet Potato from 1987-88	27
25	Area, Production and Yield of Tapioca from 1987-88	28
26	Area, Production and Yield of Soyabean from 1987-88	29
27	Area, Production and Yield of Papaya from 1987-88	30
28	Area, Production and Yield of Ginger from 1987-88	31
29	Area, Production and Yield of Arecanut from 1987-88	32
30	Area, Production and Yield of Pineapple from 1987-88	33
31	Area, Production and Yield of Citrus Fruits from 1987-88	34

LAND USE STATISTICS – Explanatory note on classification of Land

- (1) Geographical Area:- The latest figure of Geographical area for the State/Union Territory/Districts as furnished by the Central Statistical Organization based on the Survey General of India's data should only be used.
- (2) Reporting Area for Land Utilisation Statistics:- The reporting area stands for the area for which data on land use classification of area are available. In areas where land utilisation figures are based on land records, reporting area is the area according to village papers prepared by the village accountants. In some cases the village papers may not be maintained in respect of the entire area of the state. For example, village papers are not prepared for forest areas but the magnitude of such areas is known, also there are tracts in many states for which no village papers exist but, for which Ad-hoc estimates of classification of area etc. are framed to complete the coverage. In such cases, column (3) should give the summation of the area for which village papers actually exist and the area for which Ad-hoc estimates are available.
 It may be observed that the reporting area for land utilization statistics for a District/State is not larger than the corresponding area given in column (1). In case the position is otherwise, the reasons for the same may be indicated.
 The sum of Col. 3, 4, 5, 6, 7, 8, 9, 10 and 11 should be equal to Col (2)
- (3) Forest:- This should include all lands classed as forest under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands on area open for grazing within the forests should remain included under forest area.
- (4) Area under non-agricultural uses:- this should include all lands occupied by buildings, roads and railways or under-water e.g. rivers and canals and other lands put to uses other than agricultural.
- (5) Barren and unculturable lands:- This should include all barren and unculturable land like mountains, deserts etc. Land which cannot be brought under cultivation except at an exorbitant cost, should be classed as unculturable whether such land is isolated blocks or within cultivated holdings.
- (6) Permanent Pastures and Other Grazing Lands:- This should include all grazing lands, whether they are permanent pastures and meadows or not. Village common grazing land shall be included under this head.
- (7) Land under Misc. tree-crops, groves etc.:- This should include all cultivable land which is not included in 'Net Area Sown' but is put to some agricultural uses. Lands under Casuarina trees, thatching grasses, bamboo bushes and other groves for fuel etc. which are not included under 'orchards' should be classed under the category.

- (8) **Cultivable Waste:-** This should include lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession of one reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. This may be assessed or un-assessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession should also be included in this category at the end of five years.
- (9) **Fallow lands other than current fallows:-** This should include all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reasons for keeping such lands fallow may be one or more of the following:
- (1) Poverty of the Cultivators.
 - (2) Inadequate supply of water.
 - (3) Malarial Climate.
 - (4) Silting of canals and rivers and.
 - (5) Un-remunerative nature of farming.
- (10) **Current fallows:-** This should represent cropped area which are kept fallow during the current years. For example, if any seedling area is not cropped against the same year it may be treated as current fallows.
- (11) **Net Area Sown:-** This should represent the total area sown with crops and orchard counting area sown more than once in the same year only once.
- (12) **Total Cropped Area:-** This should represent the total area covered with crops i.e. the sum total of areas covered by all the individual crops; area sown with crops more than once during the year being counted as separate area for each crop.
- (13) **Area sown more than once:-** This should represent the areas on which crops are cultivated more than once during the agricultural years. This should be obtained by deducting 'Net Area Sown' from 'Total Cropped Area'.
