

GOVERNMENT OF MEGHALAYA

# AREA, PRODUCTION & YIELD OF PRINCIPAL CROPS IN MEGHALAYA

**From 2007-08 to 2012-13**

**{Includes Land Use Statistics & Irrigation Statistics}**

**Volume - IV**

*Published by:-*

**DIRECTORATE OF ECONOMICS & STATISTICS  
GOVERNMENT OF MEGHALAYA  
SHILLONG**

## **PREFACE**

Compilation and dissemination of Agriculture Statistics is one of the main functions of the Directorate of Economics & Statistics. The Directorate is responsible for collection, compilation, analysis and presentation of agricultural statistics in the State covering statistics of crop area, production and productivity (yield per hectare) of food and non food crops grown and cultivated in the state, the statistics of land use including crop forecasting (crop report statistics). The Directorate of Economics & Statistics is also coordinating with the Agriculture Insurance Company of India Ltd., the implementing agency of National Agricultural Insurance Scheme by providing the Crop Cutting Experiment yield data of insured crops to facilitate the process of settlement of crop insurance claims and to provide relief to farmers during the season of crop failure. Most importantly, the Directorate always makes an effort through the monitoring and supervision mechanism to improve the coverage, quality and timeliness of Agriculture Statistics collected from grass root levels which are very essential from the point of view of facilitating realistic conceptualization and formulation of different development programmes in the agricultural sector of the state so as to guide the process of planning and governance in the right direction.

This issue which is the fourth in the series published by the Directorate presents key statistical data pertaining to area, production and productivity of principal food and non food crops, irrigation statistics and details of land use particulars in the state in Meghalaya from the year 2007-08 to 2012-13. The data presented in the publication are based on statistics of the State Level Crop Statistics Report approved by the State Level Crop Report Committee, Meghalaya for the year 2007-08 to 2012-13.

I would like to acknowledge and place on record my gratitude and special appreciation to the Officers and Staff of the Agriculture Statistics section of the Directorate, under the overall guidance and supervision of Smt F. G. Momin, Research Officer, who have invested their best effort in bringing out the report.

I hope the report will be helpful to the policy makers, economists, policy planners, researchers and the public at large and also meet and fulfill the needs of different Government and Non Government organizations working in the agricultural sector of the state. Constructive suggestions for improvement in the quality and coverage of data are most welcome.

**(A. Kanti)**  
**DIRECTOR,**  
**Economics & Statistics**

**OFFICERS AND STAFF ASSOCIATED WITH THE PUBLICATION**

- 1) Shri V. E. Iawphniaw, Deputy Director.
- 2) Smt. F. G. Momin, Research Officer
- 3) Shri B. G Momin, Research Officer
- 4) Shri K. M. Syiem, Statistical Officer
- 5) Shri K. Hynniewta, Inspector of Statistics
- 6) Shri N. Lyngdoh, Computer
- 7) Shri A. Kharbuli, Computer
- 8) Shri S. Sangriang, Field Assistant.
- 9) Smt. V. Nongbri, Typist

<b>Sl. No.</b>	<b>CONTENTS</b>	<b>Page No.</b>
1	Area, Production & Yield of Autumn Rice from 2007-08 to 2012-13	6
2	Area, Production & Yield of Winter Rice from 2007-08 to 2012-13	9
3	Area, Production & Yield of Spring Rice from 2007-08 to 2012-13	12
4	Area, Production & Yield of Total Rice from 2007-08 to 2012-13	15
5	Area, Production & Yield of Wheat from 2007-08 to 2012-13	19
6	Area, Production & Yield of Maize from 2007-08 to 2012-13	20
7	Area, Production & Yield of Gram Pulses from 2007-08 to 2012-13	23
8	Area, Production & Yield of Tur (Arhar) from 2007-08 to 2012-13	25
9	Area, Production & Yield of Pea from 2007-08 to 2012-13	26
10	Area, Production & Yield of Cowpea from 2007-08 to 2012-13	28
11	Area, Production & Yield of Lentil from 2007-08 to 2012-13	29
12	Area, Production & Yield of Total Rabi Pulses from 2007-08 to 2012-13	30
13	Area, Production & Yield of Finger Millet from 2007-08 to 2012-13	33
14	Area, Production & Yield of Foxtail Millet from 2007-08 to 2012-13	34
15	Area, Production & Yield of Pearl's Millet from 2007-08 to 2012-13	35
16	Area, Production & Yield of Job's Tear from 2007-08 to 2012-13	36
17	Area, Production & Yield of Other Millets from 2007-08 to 2012-13	37
18	Area, Production & Yield of Total Small Millets from 2007-08 to 2012-13	38
19	Area, Production & Yield of Total Foodgrains from 2007-08 to 2012-13	40
20	Area, Production & Yield of Jute from 2007-08 to 2012-13	43
21	Area, Production & Yield of Mesta from 2007-08 to 2012-13	44
22	Area, Production & Yield of Cotton from 2007-08 to 2012-13	45
23	Area, Production & Yield of Potato from 2007-08 to 2012-13	46
24	Area, Production & Yield of Sugarcane from 2007-08 to 2012-13	49
25	Area, Production & Yield of Tapioca from 2007-08 to 2012-13	50
26	Area, Production & Yield of Tobacco from 2007-08 to 2012-13	51
27	Area, Production & Yield of Arecanut from 2007-08 to 2012-13	52
28	Area, Production & Yield of Cashewnut from 2007-08 to 2012-13	55
29	Area, Production & Yield of Tea Leaf (Green) from 2007-08 to 2012-13	56
30	Area, Production & Yield of Strawberry from 2007-08 to 2012-13	58
31	Area, Production & Yield of Pineapple from 2007-08 to 2012-13	60
32	Area, Production & Yield of Banana from 2007-08 to 2012-13	62
33	Area, Production & Yield of Papaya from 2007-08 to 2012-13	64
34	Area, Production & Yield of Khasi Mandarin from 2007-08 to 2012-13	66
35	Area, Production & Yield of Assam Melon from 2007-08 to 2012-13	69
36	Area, Production & Yield of Pomelon from 2007-08 to 2012-13	70
37	Area, Production & Yield of Other Citrus fruits from 2007-08 to 2012-13	71
38	Area, Production & Yield of Total Citrus Fruits from 2007-08 to 2012-13	72
<b>CONDIMENTS &amp; SPICES</b>		
39	Area, Production & Yield of Black Pepper from 2007-08 to 2012-13	77

<b>LAND USE STATISTICS</b>		
54	Explanatory Notes on Classification of Land	111
55	Geographical Area from 2006-2007 to 2012-13	113
56	Reporting Area for LUS from 2006-2007 to 2012-13	113
57	Forest (both Classed and Unclassed) from 2006-2007 to 2012-13	114
58	Area under Non-Agricultural uses from 2006-2007 to 2012-13	114
59	Barren and Uncultivable Lands 2006-2007 to 2012-13	117
60	Permanent Pastures and Other Grazing lands	117
61	Land under Misc. tree crops and grooves etc. from 2006-2007 to 2012-13	118
62	Cultivated Waste lands from 2006-2007 to 2012-13	118
63	Total of other Uncultivated land 2006-2007 to 2012-13	119
64	Fallow lands other than current fallows from 2006-2007 to 2012-13	119
65	Current fallows from 2006-2007 to 2012-13	120
66	Total Fallow land from 2006-2007 to 2012-13	120
67	Net Area sown more than once from 2006-2007 to 2012-13	121
68	Area sown more than once from 2006-2007 to 2012-13	121
69	Total Cropped Area from 2006-2007 to 2012-13	122
<b>IRRIGATION STATISTICS</b>		
70	Irrigation Statistics in the state of Meghalaya of 2005-06 & 2006-07	125
71	Irrigation Statistics in the state of Meghalaya of 2007-08 & 2008-09	126
72	Irrigation Statistics in the state of Meghalaya of 2009-10 & 2010-11	127
73	Irrigation Statistics in the state of Meghalaya of 2011-12 & 2012-13	128
74	Crop Cutting Experiment in Meghalaya from 2007-08 to 2012-13	131-133
<b>ALL INDIA ESTIMATES</b>		
75	All India Estimate of Rice and Maize from 2007-08 to 2012-13	137
76	All India Estimate of Foodgrains and Potato from 2007-08 to 2012-13	138
77	All India Estimate of Wheat and Tobacco from 2007-08 to 2012-13	139
78	All India Estimate of Tur & Gram from 2007-08 to 2012-13	140
79	All India Estimate of Sugarcane and Jute & Mesta from 2007-08 to 2012-13	141
80	All India Estimate of Cotton and Soyabean from 2007-08 to 2012-13	142
81	All India Estimate of Rapeseed & Mustard and Cashewnut from 2007-08 to 2012-13	143
82	All India Estimate of Ginger from 2007-08 to 2012-13	144

**AREA,  
PRODUCTION  
&  
YIELD  
OF  
PRINCIPAL CROPS  
IN  
MEGHALAYA**

## **METHODOLOGY OF CROP ESTIMATION**

The Directorate of Economics and Statistics (DES) being a nodal agency in the state, releases final estimates of area, production and yield in respect of principal crops of food-grains, oilseeds, sugarcane, fibres, important commercial, horticultural crops, land use and irrigation statistics. The estimates of crop production are obtained by multiplication of area estimates by corresponding yield estimates. The estimates of area and yield rates assume prime importance in the entire gamut of agricultural statistics.

### **1. AREA STATISTICS:**

The Directorate of Economics and Statistics has to rely on information furnished by the Community & Rural Development Blocks for preparing the estimates on area. In the absence of cadastrally surveyed data, the figures on area of crops are based on field experience of grass root level workers (Gram Sevak) who adopted conventional methods of guess/eye estimation for data requirement. In view of the absence of cadastrally surveyed data on land holdings, collection and reporting of Agriculture/Horticulture statistics had to be derived according to the available sources of information which may be considered to be within the reasonable bound. There are also crops in which the area is based on seed rates provided by Horticulture department.

### **2. YIELD ESTIMATES:**

The second most important component of production statistics is yield rates. The yield estimates of major crops are obtained through analysis of Crop Cutting Experiments (CCE) conducted under scientifically designed General Crop Estimation Survey (GCES) by the Field staff of the Directorate. The results of GCES are analyzed and an annual publication, Consolidated Results of Crop Estimation Survey on principal crops, is published by the NSSO regularly. The Crop Cutting Experiments were conducted on the basis of methodology provided by Indian Agricultural Statistics Research Institute (IASRI).

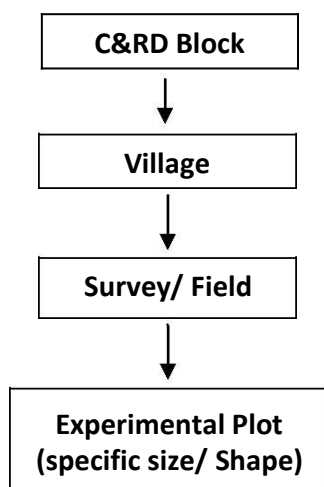

The primary objective of GCES is to obtain fairly reliable estimates of average yield of principal food and non-food crops for states and Union Territories, which are important from the point of view of crop production. The estimates of yield rates thus arrived at are generally adopted for the purposes of planning, policy formulation and implementation. The CCEs consist of identification and marking of experimental plots of a specified size and shape in a selected field on the principle of random sampling, harvesting and threshing the produce and recording of the harvested produce for determining the percentage recovery of dry grains or the marketable form of the produce.

There are some crops which were not covered in the crop cutting experiments, their production is, however, based on the data provided by the Agriculture / Horticulture Department at the block level.

### 3. SAMPLING DESIGN:

Stratified multi-stage random sampling design is generally adopted for carrying out GCES with Community & Rural Development blocks as strata, villages within a stratum as first stage unit of sampling, survey numbers/fields within each selected village as sampling unit at the second stage and experimental plot of a specified shape and size as the ultimate unit.

#### Sampling design for CCE

### 4. COVERAGE:

The crop-wise details of number of experiments planned under GCES during 2013-14 are given below:

#### YEAR 2013-2014

<i>Sl. No.</i>	<i>Crops</i>	<i>Experiment Planned</i>	<i>Experiment Conducted</i>	<i>Percentage Achievement</i>
1.	Autumn Paddy	382	376	98.43%
2.	Winter Paddy	758	758	100%
3.	Jhum Paddy	34	34	100%
4.	Spring Paddy	326	218	66.87%
5.	Ginger	614	612	99.67 %
6.	Jute	56	56	100%
7.	Maize	312	312	100%
8.	Rabi Potato	314	270	85.99%
9.	Kharif Potato	186	186	100%
10.	Rapeseed & Mustard	318	278	87.42%
11.	Cotton	20	20	100%
12.	Wheat	40	36	90%
13.	Turmeric	98	98	100%
<b>TOTAL</b>		<b>3458</b>	<b>3254</b>	-

## **5. FINAL ESTIMATE OF AREA, PRODUCTION:**

The estimation of crop area and crop production in the state is vital from the economic point of view as well as for policy decision making process of the state and central government. As agriculture is a state subject, central government depends upon state governments for accuracy of these estimates. For this purpose, state governments have set up State Level Crop Report Committee (SLCRC) which is a high level coordination committee comprising, inter alia, senior officers from Directorate of Economics and Statistics, the Departments of Agriculture, Horticulture, Soil Conservation, Conservator of Forest, Water Resources, North Eastern Space Application Centre, Revenue and Planning departments to finalize the state level estimates of crop area and production in the state in a timely and orderly manner.

**LAND  
USE  
STATISTICS**

**2006-07 to 2012-13**

## **LAND USE STATISTICS IN MEGHALAYA**

### **Explanatory Notes on classification of Land:**

**Geographical Area:-** This is the latest figure of Geographical area for the State/Union Territory/District based on the General Survey of India.

**Reporting Area for Land Use Statistics:-** The reporting area stands for the area for which data on land use classification of area available.

**Forest:-** This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land. The area of crops raised in the forests and grazing remain included under the forest area.

**Area under Non-agriculture Used :-** This includes all lands occupied by buildings, roads and railways or under-water e.g. rivers and canals and other lands put to uses other than agriculture.

**Water logged land:-** Water logged land is the land where water is at or near the surface and stands for most part of the year. It is generally found in low lying areas and it excludes lakes, ponds and tanks.

**Social Forestry:-** The land under social forestry is the land on which the trees are planted by the side of railway lines, roadside, river and canal banks with a view to meeting the fuel and fodder needs of the rural population and to serve the broader goals of soil conservation and provision of shed/ shelter for crops. It also includes village forests/ plantation that are being used by common man.

**Land Under Still Water:-** The land under still water is broadly the land occupied by water bodies like river, lakes, ponds, reservoirs, backwater, canals, tanks including nature made deeps in which water stands still for most part of the period. This is the land on which there is no vegetative growth of any kind.

**Barren and Uncultivable lands:-** This includes all barren and uncultivable land like mountains, deserts etc. lands which cannot be brought under cultivation except at an exorbitant cost, is classed as uncultivable whether such land is isolated blocks or within cultivated holdings.

**Permanent Pasture and other Grazing lands:** This includes all grazing lands, whether they are permanent pastures and meadows or not. Village common grazing land shall be included under this head.

**Land Under Misc. tree-crops, Grooves etc:-** This includes all cultivable lands which is not included in “Net Area Sown” but is put to some agriculture uses. Lands under Casurina trees, thatching grasses, bamboo bushes and other grooves for fuel etc which are not included under orchards should be classed under the category.

**Cultivable Wasteland:-** This includes lands available for cultivation, whether not taken up for cultivation or take up for cultivation once but cultivated during the current year and the last five years or more in succession of one reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings, Land once cultivated but not cultivated for five years succession should also be included in this category at the end of five years.

**Fallow lands other than current fallow:-** This includes all lands which were taken up for cultivation but are temporally out of cultivation for a period of not less than one year and not more than five years, the reason for keeping such lands fallow may be one or more of the followings:

- 1) Poverty of the cultivators
- 2) Inadequate supply of water
- 3) Malarial climate
- 4) Silting of Canals, river and
- 5) Un-remunerative nature of farming.

**Current Fallow:-** This represents cropped area which are kept fallow during the current year. For example, if any seedlings area is not cropped against the same year it may be treated as current fallow.

**Net Area Sown:-** This represents the total area sown with crops and orchards counting area sown more than once in the same year only once.

**Total cropped Area:-** This represents the total area covered with crops i.e, the sum total of areas covered by all the individual crops, areas sown with crops more than once during the year being counted as separate area for each crop.

**Area Sown More than once:-** This represents the area on which crops are cultivated more than once during the agriculture years. This is obtained by deducting “Net Area Sown” from “Total cropped area.”
