

**REPORT OF THE BUSINESS
REGISTER COMPILED UNDER
THE GRANT OF THE
THIRTEENTH FINANCE
COMMISSION**

**DIRECTORATE OF ECONOMICS & STATISTICS
PLANNING DEPARTMENT
GOVERNMENT OF MEGHALAYA**

PREFACE

Preparation of the Business Register (BR) is one of the major activities under the Thirteenth Finance Commission Grant. Business is an occupation, profession or trade. It may be defined as a person, partnership or corporation/organisation, etc, engaged in commerce, manufacturing, or a service or a profit seeking enterprise or concern. The Business Register (BR) is a list of establishments and enterprises. It serves as a statistical tool for the preparation and coordination of surveys. It is an important source of information for the statistical analysis of the business population and its demography.

The BR is a list of establishments and serves as a statistical tool for the preparation and coordination of surveys. It is an important source of information for the statistical analyses of the business population and its demography. In theory, business registers record all enterprise groups, enterprises and local units that are active in the national economy.

The Directorate of Economics & Statistics collected the list of establishments from 8 (eight) Registering Authorities in the State. The field verification/ survey were carried out after segregation as per their location.

As per the guidelines issued by the Ministry of Statistics and Programme Implementation, (National Accounts Division), Government of India, the Business Register Survey was conducted by the Directorate of Economics and Statistics, Meghalaya for the first time during 2014. This Report is divided in two parts, i.e. Part-I which includes the Introduction part, Highlights of the Report, and Tables and Part-II includes the Business Register which contains only those establishments registered with the eight Registering Authorities which were found and identified during field survey/ verification.

I would like to extend my sincere thanks to all the Registering Authorities for extending their kind cooperation in providing the required information/ data in respect of the detail lists of all the registered Establishments. They have been very forthcoming in this respect.

I would also like to extend my sincere thanks to all the establishments for sharing the information in respect of their establishments without which this report would not have been possible.

Since the entities represented by the units in the Business Register are not static (they may change form, characteristics or eventually disappear over a period of time), therefore, there is a need to update it to record units creation and deletions, as well as changes in address and stratification variables. In this regard, I would humbly request the various Registering Authorities and Establishments to extend the same co-operation to this Directorate during the process of updation of the Business Register.

Last but not the least I would like to put on record the sincere efforts of the officers and staff of the Directorate and the District Statistical Offices who have been associated with the compilation of this Report.

12th August, 2016

(D. L. Wankhar, IES)

DIRECTOR

Economics and Statistics,
Meghalaya, Shillong.

PART I

Introduction

The Government of India (G.O.I.) had set up a Commission in January, 2000 under the Chairmanship of Dr.C. Rangarajan to review the statistical system and the entire scope of official statistics in the country. The Commission submitted its Report to the Government in August 2001. One of the key recommendations of this Commission was to prepare a Centrally Sponsored Scheme to improve the Statistical Systems in States/UTs. Further with the objectives of enhancing the quality of data, improving the feedback loops to assess the fiscal impact of policy initiatives and enhance productivity, the 13th Finance Commission (FC XIII) recommended a grant of Rs. 616 crores from 2010-2015 to strengthen Statistical System in the States/UTs. This grant, @ Rs1 crore per district, is meant to be used primarily to improve statistical systems at district headquarters, though upto one fourth of the grant may be used to strengthen statistical systems at State Government headquarters. Government has accepted the recommendations.

The 13th Finance Commission (FC) grant was primarily focused on improving the statistical system at district levels for those statistical activities which are not covered under the ISSP. The broad objectives of the grant were to empower and strengthen the statistical framework and systems to provide comprehensive and standardised economic and social data support for policy and decision making. To avail the grant recommended by 13th FC, guidelines were issued by the Department of Expenditure, Finance Commission Division, Ministry of Finance. As per the guidelines, the grant may be used to strengthen operations such as census surveys, maintenance of administrative records, development of business register, setting up of geographical information systems and data bases, developing statistical meta-data databases, imparting training to officials at Districts and State Headquarters, improving network connectivity among district and state headquarters, etc.

The preparation and maintenance of the business register (BR) was one of the major activities recommended under the 13th Finance Commission.

Methodology for District Business Register

At present an up-to-date frame of enterprises at the national level is available only in respect of the units/factories covered under the Annual Survey of Industries (ASI). The ASI presently covers the relatively bigger units belonging to manufacturing and repair sub-sectors that are registered under sections 2m (i) and 2(ii) of the Factories Act 1948 or under the Bidi & Cigar Workers (Condition of Employment) Act. For the other sectors, no such updated and satisfactory frame of bigger units /enterprises exists at present.

Further, with the integration of economies and sectors due to computerisation, there arose the necessity for generating all economic statistics required for statistical administration by integrating business registers. The Business Register so developed would reduce burden on respondents and in turn induce respondents to provide proper information on items not yet collected under various registers, reduce survey cost if enterprise groups are targeted in place of establishments, and also provide information for statistical administration which is needed for framing appropriate policies for overall inclusive development in the country.

Definitions of Business and Business Register

Business is an occupation, profession or trade. It may be defined as a person, partnership or corporation/organisation etc., engaged in commerce, manufacturing, or a service or a profit seeking enterprise or concern. Business Register (BR) is a list of such establishments and enterprises. It serves as a statistical tool for the preparation and coordination of surveys. It is an important source of information for the statistical analysis of the business population and its demography.

Coverage:

In theory, business registers record all enterprise groups, enterprises and local units that are active in the national economy.

Updating:

The entities in business registers are not static. Entities are created, they may change form and they may also eventually disappear. Over the period of time, their characteristics may also undergo changes. Therefore, Business Registers contains the record of these demographic events. The Business Register is to be ideally updated at least annually to record unit creations and deletions, as well as changes in address and stratification variables.

Quality of Business Registers:

The quality of business registers is determined by how closely its contents reflect reality. Therefore important rules are made for minimum quality standards and are reviewed periodically to take account of changes in the purposes for which the register is used.

Benefits of BR:

The benefits available to various users are as under:

- For the private entrepreneurs -
 - (a) Establishing business profile for a specific area;
 - (b) Reduction in response burden by designing a prescribed format and advising the enterprises to fill up the same so that the number of existing returns can be reduced to a bare minimum;
 - (c) Setting up of a “single agency system” for receiving the returns from the enterprises and analysing and processing the same is a necessity to achieve the purpose;
 - (d) Analysing existing potential business markets; and
 - (e) Assessing/assisting market research.

- For the Government
 - (a) Reducing the administrative burden; and
 - (b) Improving efficiency in registration system.

Preparation and maintenance of Business Register at District level was one of the milestones to be achieved by the State’s Directorate of Economics & Statistics (DES). As part of the preparation of the business register, the activities carried out, inter alia, included (i) the listing of the State /District level authorities dealing with registration of legal entities with complete official addresses and designation of the officer responsible for providing information; (ii) listing of the items of statutory information at the time of registration separately for each type of institution and (iii) development of database in electronic form for consolidation of all such information for preparing of the Business Register.

As per communication received from the Ministry, vide email dated 12.04.2012 and letter No. M-11015/1/2011/ESD-VIEC dated 12.06.2012, the Ministry has identified 7(seven) Acts namely, **Companies Act, 1956** (Registrar of Companies), **Factories Act, 1948** (Chief Inspector of Factories), **Shops and Commercial Establishment Act** (Labour Commissioner), **Societies Registration Act** (Registrar of Societies/Deputy Commissioner (Legal)), **Cooperative Societies Act** (Registrar of Cooperative Societies), **Khadi and Village Industries Board** (Khadi and Village Industries Board) and **Directorate of Industries (District Industries Centre)** (General Manager/ Joint or Deputy Commissioner, District Industries Centre) for the purpose of obtaining the lists of registered establishments for preparing the Business Register of the State.

Preparation of the Business Register

The Directorate of Economics and Statistics, Meghalaya had identified the following State /District Level registering authorities (RAs) with complete official addresses and designation of the officer responsible for providing information relating to the Business register.

Name and Addresses of Registering Authorities in Meghalaya

Acts/ Authorities	State Level Registering Authorities	District level
Companies Act, 1956	Registrar of Companies, Meghalaya, Shillong	-
Factories Act, 1948	Chief inspector of Factories Meghalaya, Shillong	-
Shops and Establishment Act	Labour Commissioner, Meghalaya, Shillong	Labour Inspector:- West Garo Hills, Tura/ East Garo Hills, William Nagar/ South Garo Hills, Baghmara/ West Khasi Hills, Nongstoin/ Ri- Bhoi District, Nongpoh/ East Khasi Hills, Shillong/ Jaintia Hills, Jowai
Societies Registration Act	Registrar of Societies, Meghalaya, Shillong	Joint Registrar of Societies:- West Garo Hills, Tura/ East Garo Hills, William Nagar/ South Garo Hills, Baghmara/ West Khasi Hills, Nongstoin/ Ri- Bhoi District, Nongpoh/ East Khasi Hills, Shillong/ Jaintia Hills, Jowai
Cooperative Societies Act	Registrar of Cooperative Societies Meghalaya, Shillong	Assistant Registrar of Cooperative Societies :- West Garo Hills, Tura/ East Garo Hills, William Nagar/ South Garo Hills, Baghmara/ West Khasi Hills, Nongstoin/ Ri- Bhoi District, Nongpoh/ East Khasi Hills, Shillong/ Jaintia Hills, Jowai
Khadi and Village Industries Board	C.E.O. Khadi and Village Industries Board, Shillong	-
Directorate of Industries (District Industries Centre)	Director of Commerce and Industries, Meghalaya, Shillong	General Manager District Industries Centre:- West Garo Hills, Tura/ East Garo Hills, Williamnagar/ South Garo Hills, Baghmara/ West Khasi Hills, Nongstoin / Ri- Bhoi District, Nongpoh/ East Khasi Hills, Shillong/ Jaintia Hills, Jowai

Besides the above Registering Authorities, one more authority has been identified in the State i.e. Directorate of Medical and Health Services (MI), Shillong.

The Directorate of Economics and Statistics, Meghalaya had approached the above Registering Authorities to furnish the list of establishments registered with them along with the details of each establishment. Based on the list, segregation of the establishments was done for carrying out field verification of the units.

The number of registered establishments which were received from the Registering Authorities is presented in Table 1.

Listing of the items of statutory information at the time of registration separately for each type of establishments:

From the list of Establishments received from the Registering Authorities, it was found that the items of statutory information at the time of registration are with regards to (i) name, (ii) address with pin code, and (iii) year of registration of the units.

Development of database in electronic form for consolidation of all such information available:

Data entry was taken up by the Directorate of Economics and Statistics for those lists of establishments received from the Registering Authorities at the initial stage as per Format prescribed by Ministry vide letter no. M-11015/1/2011/ESD-VIEC dated 12.06.2012. This list included all those establishments received from District Authorities falling under the concerned Registering Authorities. These have been consolidated in the Directorate.

The list of establishments was again segregated into district-wise and forwarded to all the District Statistical Offices for further segregation to the lowest geographical unit and localities for easy identification and location during field verification.

Business Register Survey (Field Verification)

As instructed by the Ministry of Statistics and Implementation vide letter No.U-11014/16/2011- NAD-8, dated 12.04.2012, the pilot survey was carried out in the Ri-Bhoi District during 2012 which is one of the districts having higher concentration of industries/factories and establishments (with the exception of Shillong city).

Survey/ field verification for all the remaining Districts were taken up in the month of July, 2014 of those establishments shown to have registered with the Registration Authorities.

Issues and gaps identified during field survey/ verification of the establishments

- It was also observed that many of the establishments/units are registered with more than one Registering Authorities. For example, establishments are registered under both the Companies Act 1956 (registering authority is the Registrar of Companies) and also under the Factories Act 1948 (registering authority is the Chief inspector of Factories). This has greatly affected the preparation of the Business Register since the same establishment was counted/appeared in the lists of both the Registering Authorities and hence the total numbers of establishments are more than what they actually are. Since the requirement for registration was done under the various Acts, hence, the establishments were mandated to do so.
- It was also observed that in most cases, the detailed addresses of the establishments/units have not been indicated specifically hence it was difficult to identify and locate the establishments/units at the time of field survey/ verification.
- During field verification, some of the establishments located in the Ri- Bhoi District of the State were either shifted or displaced due to construction of the four-lane National Highway-40.

- Most of the establishments registered with the Registrar of Societies were untraceable due to vague or no proper addresses especially in West Khasi Hills District of the State.
- During the survey/ field verification, there are many units which were untraceable, closed or non-existing. Here the enumerators confirmed the status of such units from Village Headmen, local people, neighbouring shops or establishments.
- Some of the proprietors of the establishments were initially reluctant to give the information as they do not understand the purpose for which the information was being collected.

Highlights of the Report

1. The field survey/ verification was conducted for those registered establishments under the following Registering Authorities (i) Registrar of Companies, (ii) Chief Inspector of Boilers and Factories (iii) Labour Commissioner, (iv) Registrar of Societies, (v) Registrar of Cooperative Societies (vi) Khadi and Village Industries Board, (vii) Directorate of Commerce and Industries (District Industries Centre), (viii) Directorate of Health Services (MI) and (ix) establishments registered under Food Preservation Act were also found.
2. The total number of registered establishments in the State as received from the above 8 (eight) Registering Authorities is 23,580.
3. After field verification, out of 23,580 numbers of establishments, only 11,826 establishments were traceable (these included those establishments not found in the lists furnished by the various Registering Authorities), and the rest were either closed down, or have shifted the establishments elsewhere with no proper addresses or were untraceable.
4. After field survey/verification, it was found that only 50.15% (i.e., 11,826 out of 23,580 establishments) of the establishments were found existing.
5. In the West Khasi Hills Districts, there were many non-profit institutions registered with the Registering Authorities but on field verification most of them were untraceable as there were no proper addresses. There were 4,749 establishments listed with Registrar of Societies but after field verification only 778 establishments were traceable.
6. During the survey/ field verification, it was found that there were as many as 136 establishments which have already been registered with different Registering Authorities but their names were not available with the lists furnished by the Registering Authorities.
7. Out of 11,826 traceable establishments, there are 5,494 (46.46%) establishments located in the rural areas and 6332 (53.54%) establishments in the urban areas.
8. In the 11,826 establishments, there were 83,535 numbers of workers, out of which 48,435 (57.98%) number of workers in those establishments located in the rural areas and 35,100 (42.02%) number of workers in those establishments located in the urban areas.
9. The highest percentage of the major activity of the establishments is in the retail trade (excluding retail sale of automobiles and motor cycles) which is 38%, followed by the human healthcare and social work which is 13% and manufacturing (including repair and installation of machinery and equipment) which is 12%.
