

Price Bulletin

2022

15th Annual Edition

सत्यमेव जयते

**GOVERNMENT OF MEGHALAYA
DIRECTORATE OF ECONOMICS AND STATISTICS
MEGHALAYA, SHILLONG**

PREFACE

Price Bulletin 2022 is the 15th annual bulletin brought out by the Directorate of Economics & Statistics, Meghalaya, Shillong. The main objective of the Price Section of the Directorate is to collect primary data, compile and publish the data in the form of Price Bulletin so as to enable the report to be made available to the public from time to time. The Price Bulletin is a publication containing the monthly average retail prices of both urban and rural centres which has been identified for price collection. In addition, the annual average changes in the price of 21 select commodities is regularly computed for every five years (percentage increase over the previous year). In this publication, the years 2020-2021 could not be computed due to the pandemic and hence the data is not reflected in the table. Therefore, the data gap of two years has shown abnormal increase and decrease of price data as the percentage increase/decrease is not over the previous year but of three years i.e., 2019.

The Price Bulletins of 2020 and 2021 was to be published during the years 2021-2022, preceding the 14th annual bulletin in 2019. However, due to the global pandemic the publication had to take a backseat, due to want of data. This publication has been compiled by the staff of the Price Section of the Directorate based on the reports provided by the field staff posted in different districts and C&RD Blocks of the state.

I would like to express my appreciation to the Price Section of the Directorate under the supervision of the Research Officer for their tireless diligence in the preparation of this bulletin.

I hope that this bulletin will be of immense use to policy makers, planners and researchers and others who are interested in knowing the price trend of certain commodities in the state.

Lastly, suggestions for improvement of the quality and contents of the publication would be welcomed and highly appreciated.

A.M. Laloo
Director
Economics and Statistics
Meghalaya, Shillong

INTRODUCTION

Price Statistics is an important indicator of the changes in the general price level of essential commodities in the state. The data on price statistics indicates the economic situation of the state and thus plays an important role in the policy decision of the Government. Such policies have an impact on the economic growth and development of the state. Collection and compilation of price statistics on food and non- food items is one of the regular work programmes of the Directorate of Economics and Statistics. Wholesale prices are collected from identified price centres in the seven district headquarters while Retail prices are collected from both the district headquarters and rural price centres by the staff of the Directorate in the District Office and by the Sub-Inspector of Statistics who are posted in the Community and Rural Development Blocks of the state. The monthly average for each centre has been computed from the weekly and monthly price returns.

The following are the price data collected and maintained by the Directorate to be incorporated in this publication:-

1. **Wholesale Prices:** - Wholesale prices on food and non-food items in Meghalaya are collected from 7 Urban Centres namely Shillong, Jowai, Nongstoin, Nongpoh, Tura, Williamnagar, and Baghmara. Food items are collected on weekly basis while non-food items are collected on monthly basis.
2. (i) **Retail Prices (Urban):** - Retail prices for urban areas are collected also from the 7 Urban Centres namely Shillong, Jowai, Nongstoin, Nongpoh, Tura, Williamnagar, and Baghmara. The price data are collected on weekly basis for food items including non-food items under heading II (A) Fuel and Lighting and (B) Pan, Tobacco, etc. Other non-food items are collected on monthly basis.

(ii) **Retail Prices (Rural):** - Retail prices from rural areas are collected on monthly basis for both food and non-food items from 24 selected Centres spread all over the state, namely, Ladrymbai, Amlarem, Ummulong, Mawryngkneng, Mawngap, Mawshynrut, Pynursla, Mawsynram, Mawkyrwat, Mawpyllun, Umsning, Byrnihat, Sohra, Mairang, Rongjeng, Songsak, Rongsak, Mendipathar, Barengapara, Chokpot, Rongara, Rongram, Dadenggre and Betasing.
3. (i) **Consumer Price Index for Industrial Workers:** Consumer Price Indices for Industrial Workers is used for regulation and determination of Dearness Allowance for Central and State Government Employees and revision of minimum rural wages for different categories of labourers in the State. The Consumer Price Index for Industrial Workers on New Base 2016=100 from September, 2020 has been launched by the Hon'ble Minister of State (I/C) for Labour & Employment, Government of India, Shri. Santosh Kumar Gangwar on 22nd October, 2020. It may be mentioned that Shillong has been included as the new price centre and is being collected by the office of the District Statistical Officer, East Khasi Hills District.

(ii) **Consumer Price Index for Agricultural and Rural Labourers:** The Consumer Price Indices for Agricultural Labourers and Rural Labourers is being compiled and released every month by the Labour Bureau, Shimla are presented in this Price Bulletin.

(iii) **Consumer Price Index for Rural, Urban and Combined:** The Consumer Price Indices for All-India and States/UTs separately for Rural, Urban and Combined is being compiled by the National Statistical Office, Ministry of Statistics and Programme Implementation for the purpose of intra temporal price comparison with effect from January, 2011 with 2012 as the Base Year. The monthly indices for Rural, Urban and Combined for Meghalaya and other North Eastern States and All-India for the year 2019 have been presented in this publication.

LIMITATIONS OF THE DATA

The price data as shown in the Price Bulletin are averages of prices collected from different identified centres on an annual and monthly basis and does not reflect the actual price while centre wise prices are available in the Directorate. Therefore, discretion should be applied while comparing the data in this bulletin. In retrospect, the price data of the commodities only shows the price trends over a period of time and should not be construed as the actual price of the commodities.

There are centres where prices reported are of only 10 to 15 items out of the total 25 items of the Weekly Wholesale Prices for food and 5 to 7 items of non-food items for certain periods as the items were unavailable due to seasonality, infrastructural issues, unwillingness on the part of the sellers to quote/ disclose the price of commodities. In addition, prices that are collected in the rural areas are only retail prices while wholesale price centres are collected only from the identified district headquarters of the state.

There are other limitations pertaining to price collection such as lack of sufficient manpower, changes of the market days on a weekly basis especially in the Khasi- Jaintia Hills region and lack of robust data sharing mechanism.
