**REPORT
ON
ECONOMIC CENSUS
1990**

GOVERNMENT OF MEGHALAYA
DIRECTORATE OF ECONOMICS AND STATISTICS,
MEGHALAYA, SHILLONG.

P R E F A C E

The third Economic Census in Meghalaya was launched during the months of May to July, 1990 along with the House Listing operation of population Census, 1991. The collection of data on economic censuses has been one of the main planks of the Indian Censuses, yet want of more detailed information and lack of reliable data have created a gap to providing information for planning and formulation of policy programmes.

The first Economic Census of the State was conducted in 1977 in order to bridge the gap but the said census covered only the Non-agricultural establishments i.e. enterprises employing at least one hired worker on a fairly regular basis. Since the launching of the First Economic Census, notable changes have been effected both in the scope and coverage. Therefore, all enterprises (establishments and own account enterprises) excluding those engaged in crop production and plantations are covered in the successive Economic Censuses of 1980 and 1990.

With a view to facilitating the operation and rendering the economic terms, more comprehensible, translation of Instruction Booklets in Khasi and Garo languages for Economic Census 1990 have been done for the first time. The works have been voluntarily and creditably completed in a very short time by S/Shri O. S. Lyngdoh, (Deputy Director) C. M. Syiem, (Research Officer) J. D. Shira and P. G. Momin (both Statistical Officers) and were ably assisted by S/Shri S. Mawlong V. K. Lyngdoh and S. G. Momin (all Inspectors) by working beyond office hours. In order to supervise the operation where the success of the census very much rests, all the above officers and also S/Shri K.K. Raju (Research Officer) and B. D. Choudhury (Inspector of Statistics) took up the responsibilities in imparting trainings at various centres. As no officers were appointed up to the end of 1991 under the Economic Census Scheme, the works on Economic Census had to be undertaken by the existing personnel of this Directorate in addition to their normal duties.

This report is compiled on the basis of the Final results of the Third Economic Census. It is therefore provides information on the various economic and social infra-structures of the State and also separately for Rural and Urban. The present report is the result of the sincere effort in the part of S/Shri O. S. Lyngdoh (Deputy Director) C. M. Syiem, (Research Officer) B. D. Choudhury and S. G. Momin (both Inspectors).

This report is compiled on the basis of the final results of the Third Economic Census. It is therefore, provides information on the various economic and social infra-structures of the State and also separately for rural and urban.

Lastly, this Directorate is grateful to all those who have rendered valuable services and to the charge officers, supervisors and enumerators belonging to different State/Central Governments other organisations and teachers of different institutions.

It is hoped that the information presented in this report would be useful to administration, Planners, Research Workers, Social Scientists and others interested in the economy of the State of Meghalaya.

Dated Shillong,
the 1st September, 1992

A. U. CHOUDHURY,
Director of Economics & Statistics,
Meghalaya, Shillong.

ECONOMIC CENSUS—1990

CHAPTER--I

INTRODUCTION

1.1 Census is one of the most reliable methods in the process of collection of data on various economic aspects and such data are essential for the formulation of programmes and planning. Availability of statistics for agriculture sector is fairly sound, for instance data are available from agricultural census. On some organised segments of non-agricultural sector data are being collected regularly through normal administrative channels and surveys, such as registered factories through the annual survey of Industries. Public enterprises; e.g. Transport Corporation, State Electricity Board, Banks, Insurance and other departmental and non-departmental enterprises through their statements of accounts, but there is almost a complete lack of reliable data on other un-organised segments of economy like un-registered manufacturing, trade, hotels and restaurants, construction and services where no information on input, output, employment and inventory of fixed assets are available from the un-organised sectors of non-agricultural economy. Paucity of information in the un-organised sectors leads to the neglect of development and planning for this sector and also effect in the planning and programmes of organised sectors.

1.2. Thus for planning a balance economic growth, the Central statistical Organisation launched the Third Economic Census, 1990 in collaboration with the State Statistical Bureaux to remove the data gap in the unorganised segments of non-agricultural sectors. As census is one of the best methodology for data collection, Economic Census 1990 was synchronised with the House Listing Operations in 1990 during 1991 population census, which was also quite convenient for operation and cost effectiveness.

ATTEMPTS MADE EARLIER

1.3. Attempts have been made earlier to collect the information to fill data gaps in the unorganised sector of non-agricultural economy. The Economic Census was aimed at providing such basic information in distribution of non-agricultural enterprises and the follow-up surveys for collection of detailed information about the structure of enterprise, investment input, output, employment etc. of the enterprise.

1.4. The first economic census in the State of Meghalaya was carried out in 1977 by the Central Statistical Organisation in collaboration with the State Statistical Bureau to remove data gaps in the unorganised sectors of non-agricultural economy covering un-registered manufacturing, trade, transport, services, etc. The Census of non-agricultural establishments employing at least one hired worker on a fairly regular basis was conducted to collect basic items of information such as description of activity, number of persons usually working, type of ownership, etc. Based on the census framed sample surveys of selected establishments in different sectors, follow-up studies were taken up during 1978-79 and 1979-80 for collection of detailed information relating to value of inputs-outputs, investments, emoluments, employment etc. The un-organised manufacturing sector was covered during 1978-79 and 1979-80, studies relating to un-organised activities towards trade, transport, hotels and restaurants, storage and warehousing and services were undertaken. The small establishments and own-account of self employed enterprises were surveyed by National Sample Survey Organisation, Government of India as part of their normal work programmes during 33rd and 34th rounds of NSS; while the larger establishments were surveyed by the special staff appointed under the Scheme in the Central Sector.

1.5. The Second Economic Census was conducted in 1980, alongwith the house-listing operations of 1981 population census with increased scope and coverage. In the Economic Census 1980, own account enterprises were covered for the first time on a census basis. Besides the non-agricultural enterprises, agricultural enterprises excluding crop production and plantations were covered for the first time, in 1980 Economic Census. The items of information collected in the census covered the location of the enterprises, description of the activity of the enterprises, nature of operation, type of ownership, social group of owner, power/fuel used for the activity and the total number of persons and the number of hired persons usually working in the enterprise. The need for essential minimum items, simplicity and experience gained in the first economic census have been taken into account in designing the collection of various items of information. Three follow up surveys were designed and carried out, one in 1983-84 on hotels and restaurants, transports, storage and warehousing and services. The second survey was carried out in 1984-85 on unorganised manufacturing and the third in 1985-86 on whole sale and retail trade.

1.6. In order to continue the follow-up survey programme, the frame of 1980 Economic Census was updated during 1987-88. On the basis of the updated frame, a survey on hotels and restaurants and transports was conducted in 1988-89. The second survey on unorganised manufacturing was carried out in 1989-90. The third survey on whole sale and retail trade was conducted during 1990-91. The fourth survey on services will be conducted during 1991-92.

NEED FOR REPEAT CENSUSES

7. Economic Census is the only source for preparation of a complete frame for detailed enquiries intended to cover information on nature of activity, employment, emoluments, expenditure, receipts, inventory of fixed assets etc. of the enterprise, to be covered on a sample basis. In view of the rapid changes in the structure of unorganised segments of non-agricultural sectors due to high mobility and mortality of the small units and also in view of the births of new units, it is very necessary to update the frame frequently. The five year interval is considered to be minimum period for conducting the census periodically.

1.8. As the frame based on Second Economic Census as also the updated frame of 1987-88 were no longer useful, a new frame was considered very necessary for further follow-up surveys. The Third Economic Census was therefore, immediately required. For the sake of operational conveniences and cost effectiveness, the third economic census was synchronised with the house-listing operations of the population census 1991.

SCOPE AND COVERAGE

1.9. Under the Third Economic Census, a complete enumeration of entrepreneurial activities other than crop production and plantation in rural and urban areas of Meghalaya was carried out. Information such as location of the enterprise, description of activity of the enterprise, nature of operation, type of ownership, social group of owner, power/fuel used for the activity, number of persons usually working daily in the enterprise and the number of hired persons usually working were collected at the location of enterprise. The need for essential minimum items, simplicity and experience gained, in the First and Second Economic Censuses have been taken into account in designing the schedules for the collection of various items of information in 1990 Economic Census.

Economic Census Programme and Tabulation of Data Approach in Different Censuses

1.10 In 1977 Economic Census, the listing of non-agricultural establishments was carried out from door to door in the urban areas. In the smaller villages, the village level list was canvassed and information regarding non-agricultural establishment was collected from the Headman and the knowledgeable persons of village. Own-account enterprises and agricultural enterprises were not covered.

1.11 The Second Economic census was carried out in 1980. In most of the states the economic census was taken up in April 1980. In Meghalaya the Economic Census was taken up in the months of September and October, 1980. The 1980 Economic Census was carried out along with the Rouse-listing operation of 1981-population census.

1.12 The Third Economic Census in Meghalaya was carried out during the months of May to July 1990 along with the house-listing operation of 1991 Population Census.

House-list Approach

1.13 In the house-listing operation, after numbering the buildings and houses, information on the purpose for which the census house was used and whether the members of the household were engaged in any entrepreneurial activity outside the census house and without premises were collected by the enumerators. Based on the above information an enterprise was identified and certain particulars of an enterprise were recorded in the enterprise list. Thus, while filling up the house-list which served as a frame for the enterprises. A separate enterprise list was prepared as a part of home-listing operation. Col. (7) of the house-list i. e. purpose for which the census house is used (wholly or partly for running one or more enterprises) indicated for those enterprises within premises and selected. Characteristic of such enterprises were recorded in the enterprise list. A aim in the Col. (20) of the house-list indicated about members of the household engaged in one or more enterprises outside the census house and without premises or in the open air. such enterprises also were recorded in the enterprise list as enterprises without premises. Besides the above information the house-list contained many other items also. Facsimile of the house-list is given in ANNEXURE-I,

Concepts and Definitions Classification Enterprise

1.14 An enterprise is an undertaking engaged in production and/or distribution of goods and/or services not for the sole purpose of own consumption. The workers in an enterprise may consist of members of the household or hired workers or both. The activity of an enterprise may be carried out at one or more than one distinct location. The activity of the enterprise may also be carried out at only for part of the year but on a fairly regular basis i. e. it should be in operation for the major part of the season/year. Such cases should also be considered as an enterprise. An enterprise may be owned or operated by a single household or by several households jointly (on a partnership basis) or by an institutional body or by Government.

Agricultural Enterprise

1.15 An agricultural enterprise for the purpose of Economic Census is defined as one engaged in livestock production, agricultural services, hunting, trapping and game propagation, forestry and logging and fishing. Enterprises engaged in activities pertaining to agricultural production and plantation were not covered under the census.

Non-Agricultural Enterprise

1.16 Enterprises engaged in all other activities were termed as non-agricultural enterprises namely, mining and quarrying, manufacturing and repair services, electricity, gas and water supply, construction, wholesale and retail trade, transport and services, financial, real estates and business services, community, social and personal services, etc.

Establishment

1.17 An enterprise engaged in economic activity with the assistance of at least one hired worker on a fairly regular basis is defined as establishment.

Own Account Enterprise

1.18 An enterprise operated with the help of household labour only is termed as own account enterprise.

Nature of operation

1.19 An enterprise is considered as perennial if the activities are carried out by that enterprise in all the seasons of the year.

Seasonal

1.20 An enterprise is said to be seasonal if the activity of that enterprise is carried out only during a part of the year.

Type of Ownership

1.21 An enterprise will be treated as private if it is managed by a single or a group of persons such as (i) proprietary (ii) partnership (iii) private and public limited (iv) institution trust.

Co-operative

1.22 All enterprises registered under the Act of Co-operative Society will be considered as co-operative.

Public Enterprise :

1.23 Enterprises owned by Central Government, State Government, Public Sectors Undertakings, Local Bodies are termed as public enterprises.

Power/Fuel used for activity

1.24 Power/fuel used in carrying out the entrepreneurial activity, without which an economic activity of an enterprise cannot be carried out, are considered as power/fuel used by that enterprise. The different sources of power/fuel are electricity, coal/soft coke, petrol/diesel, gas, firewood, bio-gas, kerosene, animal power and others.

Number of Persons usually Working

1.25 This represents the number of persons on an average, the number of persons usually working in the enterprise on a working day during the last year of the activity of the enterprise. It relates to the position in the last year for perennial and last working season for the seasonal enterprise. It includes all categories of workers and the members of the household paid or unpaid workers engaged in the activity.

Planning and Organisational Details

1.27 A good deal of spade work had to be carried out for organising the Census. A Technical Advisory Group (T. A. G.) under the Chairmanship of the Special Secretary, Planning Commission and experts both Central and State Governments and Non-Governments, Research and Users Organisation was constituted by the Central Statistical Organisation to provide all technical guidance for the Third Economic Census. The Technical Advisory Group had two meetings and finalised the scope, coverage and concepts. It also finalised the enterprise list forms to be canvassed during the house listing operations for the population census 1991 and tabulation plan of 1990 Economic Census.

1.28 The registrar General and Census Commissioner of India and the Director of Census Operation's were responsible for the organisation and co-ordination of field operation. The over all responsibility for technical guidance and tabulation of the Economic Census data rests with the Central Statistical Organisation in co-operation with the Bureaus of Economics and Statistics and their Officers and Staff. In Meghalaya a common intensive training programme was organised for house listing of the population census and enterprise lists of Economic Census by the officers of the Directorate of Census Operation and the Directorate of Economics and Statistics, Meghalaya respectively. Similarly, right from the beginning of the house listing and canvassing of enterprise list, the Director of Economic and Statistics assisted by the Deputy Director and Research Officers, at Headquarter were responsible for all types of works. At the district level, all the District Statistical Officers were made responsible for economic census work in their respective districts. Officers of the Directorate of Economics and Statistics jointly with the officers of the Directorate of Census Operations provided all the technical guidance in the field for canvassing the schedules on house listing, enterprise list and Enterprise List Abstract. After completion of the field work, scrutiny, coding, data processing and report writing for Economic Census rest with the Directorate of Economics and Statistics, Meghalaya.

Items of information collected in Enterprise List

1.29 In the enterprise list the following items of information were collected alongwith the houselisting operation of 1991 population census:—

Line number of the House List (column 1 of H. L.)

1.30 Every line has been numbered serially in column 1 of H. L. Corresponding to the enterprise identified in the H. L. either in column 7 or column 20, there was a line number given in column 1 of H. L. This number was copied from column 1 of H. L. and entered in column 1 of Enterprise List.

Census House Number (column 3 of H. L.)

1.31 Corresponding to the enterprise identified in column 7 or column 20, there was a census house number given in column. 3 of H. L. That census house number was entered in column 1 (i) of Enterprise List

Serial Number of Enterprise (column 7 of H.L.)

1.32 For each enterprise identified in column 7 of H.L., a continuous serial No. was given within brackets. That number was entered in column 2 of Enterprise List.

Serial Number of Enterprise (Column 20 of H. L.)

1.33 For each enterprise outside the census house and without premises, a continuous serial number was given in column 20 of H.L. within brackets. That number was entered in column 3 of Enterprise List

Description of Activity

1.34 The major activity of the enterprise was described on the basis of income or turnover or number of persons employed, depending on the information readily available during enquiry, it is possible that more than one entrepreneurial activity is carried on in the same census house or outside census house without premises. If the activities are carried on by the same person on the same household and separate accounts are kept for each of these activities, they should be treated as separate enterprises. If the activities cannot be distinguished, the major activity will be treated as the activity of the enterprise. Sufficient details of the enterprise are given i.e. medical shop, electrical shop, etc.

Classification of Enterprise

1.35 Enterprise is classified as agricultural or non-agricultural depending on the nature of the activity of the enterprise.

Nature of Operation

1.36 This item of information is also collected and the code number is assigned as per the definitions. Similar information have been collected for social group of owner, power/fuel used for activity, and number of person usually working daily for each enterprise.

Field agency for Enumeration and Supervision

1.37 The part time services of locally drawn personnel such as school teachers, village level workers, municipal workers, employes of various departments of state/central government were appointed as enumerators for house-listing operations. The services of these enumerators were also utilised for canvassing and filing of the enterprise list. The local officials of higher level were appointed as supervisors. In all the services of about 7000 enumerators and supervisors were utilised for the census work. The Block Development Officers, Sub-Divisional Officers and Extra Assistant Commissioners were appointed as Charge Officers. The over-all responsibility for technical guidance of the field operations of Economic Census and the Operations of house listing were fully co-ordinated between the Director of Census Operations and the Director of Economics and Statistics and their officers and staff.

Release of Provisional results of census based on quick manual tabulation

1.38 Arrangements were made for quick tabulation of certain items of the enterprise list by the enumerators themselves. For this purpose an Enterprise List Abstract was prescribed to be filled up immediately after the field work by enumerators. This was part of the census operations and for this purpose an Enterprise List Abstract was to be prepared at the enumerators' block level soon after the field work in enumeration block was completed. For the aggregations at the block and district level, the work was entrusted to the staff of the Directorate of Economics and Statistics. The quick manual tabulation results have been released by the Directorate of Economics Statistics during February, 1991.

Preparation of summary statements need for Frame for Follow-up surveys

1.39. After the release of Quick Manual Tabulation result the summary statements providing information on private and cooperative enterprises by major activity group, rural and urban separately public enterprises by major activity groups, distributions of enterprises village-wise an enumeration-block-wise, with break-up non-agricultural enterprises and agricultural enterprises, directory and non-directory establishments were prepared. The work on preparation of summary statement was carried out at computer centre after due scrutiny and coding exercised by the Directorate of Economic and Statistics.

1.40 The information available from the Economic Census such as number of agricultural and non-agricultural enterprises and their activities, directory and non-directory establishments, own account enterprises village-wise and enumeration block-wise provide a complete frame for the detail enquiries intended to cover the information on nature of activity, employment, emolument, expenditures receipts inventory of fixed assets etc. The frame prepared on the basis of Third Economic Census 1990 was to provide all the information for the follow-up surveys.

Tabulation plan and Arrangements for computer processing of data

1.41 The Tabulation plan as prepared by Central Statistical Organisation was strictly followed while preparing the Tables. As per Tabulation Plans the enterprises were broadly divided into two broad groups. viz., on-account enterprises and establishments. Table given number of enterprises and employment there-in were prepared at state level for all enterprises activity-wise.

1.42 Establishment Tables covering all types of establishments with tables on private sector establishments and establishments of co-operative sectors, classification of activities under agricultural, and non-agricultural sectors all types of district profile separately for rural, urban and combined are prepared.

1.43 As there are no computer facilities in the Directorate of Economics and Statistics Meghalaya, processing of data has been done in the Regional Computer Centre, Calcutta, after scrutiny and coding of the enterprise lists by the staff of the Directorate of Economics and Statistics Meghalaya. The work relating to error records at different stages was done by the staff of this Directorate.

Formats of the report (Mentioning inter-alia charts and Diagram included)

1.44 The report on Economic Census presents the main feature of the census results and the detailed tables at State/district level with separate results for the rural and urban areas.

1.45 The State report is divided into two parts. Part I deals with salient aspects of the results at the state level together with its descriptive analyses. Part II gives the results of tabulated data in details.

Part-I: Contains five chapter, one deals with introduction such as descriptions of the availability of data in the agricultural and non-agricultural sectors of the economy, attempts made earlier to cover the data gap with special reference to 1977 and 1980 Economic Census and follow-up Survey; Economic Census Programme and Tabulation of Data, approach in different census House List approach Concepts and Definitions, Classifications, Planning and Organisational, details, Field Agencies for enumeration and supervision etc.

Chapter-II: Contains the results at a glance, i.e. the number of enterprises, total number of persons employed in agricultural and non-agricultural sectors and their selected characteristics. The results indicate also the inter-districts comparison on concentration of enterprises with respect to population areas, comparison between the results of the State of Meghalaya and All-India of 1980 Economic Census and provisional results of 1990 Economic Census, and the comparison of 1977, 1980 and 1990 Economic Census, result in respect of non-agricultural establishments of the State of Meghalaya.

Chapter-III: Deals with principal characteristics of agricultural enterprises.

Chapter-IV: Contains the principal characteristics of non-agricultural enterprises.

Chapter-V: Salient features of introduction, agricultural enterprises and non-agricultural enterprises. Highlights of Economic activity in the State.

1.46 Some tables along with due interpretation of tables relating to different chapter are indicated below.

CHAPTER—II

RESULT AT A GLANCE

TABLE :1.1

Number of enterprises and persons usually working in agricultural and non-agricultural Sectors

Sl. No.	Particulars	Sector	Own account enterprises	Establishment	Total	
1	2	3	4	5	6	
1	Number of enterprises	Rural	14865	17314	32179	
		Urban	7909	9883	17792	
		Total	22774	27197	49971	
2	Number of Agricultural Enterprises	Rural	1104	797	1901	
		Urban	196	165	361	
		Total	1300	962	2262	
3	Number of Non-Agricultural Enterprises	Rural	13761	16517	30278	
		Urban	7713	9718	17431	
		Total	21474	26235	47709	
4	Number of Total Person usually Working	Rural	22252	62334	84586	
		Urban	10597	74793	85390	
		Total	32849	137127	169976	
5	Number of person usually Working in—					
		(i) Agricultural Enterpriser	Rural	2295	2022	5117
		Urban	386	543	929	
(ii) Non-Agricultural Enterprises	Rural	2681	3365	6046		
	Urban	19957	59512	79469		
	Total	10211	74250	84461		
	Total	30168	133762	163930		

TABLE 1:1.

Table 1.1 : Shew that out of 49,971 enterprises in the State, 32,159 (64.40%) were in the rural areas and 17,792 (35.60%) were in the Urban areas. Further when bifurcated between the Agricultural and Non-Agricultural Enterprises, it has been seen that 2,262 (4.53%) only were Agricultural Enterprises and 47,709 (95.47%) were Non-Agricultural Enterprises. Again out of 49,971 Enterprises, 22,774 were Own-Account Enterprises and 27,197 were Establishments. In the case of Agricultural Activities the number of own-Account Enterprises was more than that of Establishments, but in the case of Non-Agricultural Activities, the number of Establishments was more than that of Own-Account Enterprises. Persons usually working in the Enterprises were 1,69,976 and the percentage share of employment between Agricultural and Non-Agricultural Enterprises was 6,046 (3.56%) and 1,63,930 (96.44%) respectively.

TABLE : 1.2

Activity (Major)-wise distribution of Non-Agricultural Enterprises

Sl. No.	Major Activity	No. of Enterprises			Total
		Own Account	Establishment		
1	2	3	4	5

TABLE : 1.2

Table 1.2 :— Revealed the major activity-wise distribution of Non-Agricultural Enterprises. Out of 47709 Enterprises, the higher order of concentrations were marked in Retail trade followed by Community, Social and Personnel Services, Restaurants and Hotel and Manufacturing which together constituted about 87.04% of the total Enterprises. Out of 17 250 Enterprises engaged in the Retail Trading Activities (12,141 (70.38%) were Own-Account Enterprises) while in the case of Enterprises falling in Manufacturing, Restaurants and Hotels Community, Social and Personnel Service, the number of establishments was more than that of the Own Account Enterprises.

TABLE : 1.3

	Scheduled Castes ...	442	310	752	397	264	661

TABLE: 1.3

Table: 1.3 :- It is seen from table 1.3 that out of 22,774 Own Account Enterprises 14,956 (65.67%) were owned by Scheduled Tribe and 752 (3.30%) by Scheduled Caste and the rest by others. Out of 27,197 establishments, 10,535 (38.74%) were owned by Scheduled Tribe and 661 (2.43%) were owned by Scheduled Caste. It has also been observed that as large as 12,257 (82.45%) own-account enterprises in Rural areas and 7,046 (89.09%) in Urban areas were operating without Power/Fuel. In the case of establishments operating without Power/Fuel, the percentages in Rural and Urban areas worked out at 78.92% and 73.64% respectively. The proportion of Own-Account Enterprises which were seasonal in nature to their respective totals was only 4.40% in Rural areas and 1.52 per cent in Urban areas. The proportion of Own-Account Enterprises without Premises in Rural and Urban Combined to Total Own-Account Enterprises in the State was 21.84 per cent while the proportion of Establishments without premises in Rural and Urban Combined to Total Establishments was 14.0 per cent.

TABLE : 1.4

Table: 1.4 Looking at the results of Economic Census 1990 and Provisional results of Population Census 1991, the number of Enterprises per 1000 population in the State works out to 27.09. The district-wise distribution of enterprises per 1000 population revealed that the highest concentration of enterprises in all activities was in East Khasi Hills with 32.92 enterprises and the lowest was 20.43 in West Garo Hills. As regard the district-wise distribution of enterprises per 1000 population by major activity groups, the results indicated that in mining and quarrying, the number of enterprises ranged from 0.01 in West Khasi Hills, to 0.88 in Jaintia Hills while in manufacturing the number of enterprises varied from 1.09 in East Garo Hills to 3.25 in Jaintia Hills. In Construction, the number varied from 0.39 in Jaintia Hills to 1.12 in West Garo Hills. In the wholesale and retail trade and also in hotels and restaurants, the highest concentration was reported in East Khasi Hills with 14.43 and 3.72 enterprises respectively. West Khasi Hills with 10.93 enterprises was leading in Community Social, Personal and other services.

TABLE : 1.5

Inter-District Comparison of Number of Enterprises per 10 Sq. Km.

All Activities ...	17.00	41.62	10.69	16.20	17.54	21.27
Area in Sq. Km ...	3819	5196	5247	2603	5564	22429

Table 1.5: The district-wise ^{concentration} construction of enterprises per 10 sq. kms by major activity groups is given in table 1.5. From the results, it is seen, that the number of enterprises in all activities in the State works out to 21.27 per 10 Kms. The highest concentration of enterprises by major activity group per 10 Sq. kms has. been reported as follows:—

Mining and Quarrying 0.51 in Jaintia Hills, Manufacturing 3.26 in East Khasi Hills, Construction 0.96 in West Garo Hills. East Khasi Hills was leading in wholesale and Retail Trade with 18.25 enterprises; Hotels and Restaurants with 4.70 Community, Social, Personal and Other Services with 11.49 and West Khasi Hills showed the lowest number of enterprises with 0.01 in Mining and Quarrying, 0.62 in Manufacturing, 3.10 in Trade, 1.49 in Restaurant and Hotels, 0.04 in Financial, Insurance and Business Services and 4.53 Community, Social, Personal and Other Services.

Thus the table on inter-district comparison of number of enterprises per 10 Sq. kms revealed that out of 9 major sectors of the economy of the State, East Khasi Hills district State was leading in 7 sectors while West Khasi Hills district shared the lowest number of enterprises in 7 sectors of the economy of the State.

TABLE: 1.6

Table 1.6: Meghalaya being a small State, the number of enterprises is also small compared to that of All-India. Table 1.6 shows the percentage share of Meghalaya against the All-India figures, in respect of enterprises, employment, etc. as per the 1980 and 1990 Economic Censuses results.

According to the results of the 1980 Economic Census, the Share of Meghalaya to All-India in the total number of all enterprises was 0.17% and the same percentage worked out in the case of Agricultural as well as in Non-Agricultural enterprises, whereas in respect of Own-Account enterprises and Establishments, Meghalaya accounted for 0.11% and 0.37% respectively, of the corresponding National figures.

In All-India, there were 524.91 lakhs of persons usually working in the enterprises against 1.69 lakhs in Meghalaya. Again, there were 284.40 lakhs hired workers in All-India as against 0.76 lakhs in Meghalaya.

According to provisional results of 1990 Economic Census there were 23.87 lakhs Agricultural enterprises in the country. (excluding Bihar, Jammu and Kashmir, Tamilnadu and some Enumeration Blocks of Hoogly, 24 Parganas and Howrah districts of West Bengal), While in Meghalaya there were 0.002 lakh only.

9.	Total	21957	82535	133762
10.	Hired	18121	74645	116023
Shares of Rural Areas in Percentage				
11.	Number of Establishments	60.86	68.71	62.95
12.	Number of Total Person usually Working	58.48	39.79	44.49
13.	Number of Hired Workers	46.23	39.21	43.27

Table 1.7: In the 1977 Economic Census complete enumeration was not done in a village with less than 5000 population and a village level list approach was rather adopted. In this approach the enumerators sought information about establishments in the village from knowledgeable persons ~~per-~~ such as Headman, Local Committee Secretary, etc. But in 1980 Economic Census, complete enumeration was done in all villages irrespective of their population. In 1990 Economic Census, the required information necessary for identifying the enterprise and other particulars relating to the enterprise was collected by contacting the head or any other responsible person of the enterprise/household on location basis for both enterprises with premises and enterprises without premises/ outside the census house from the head of the household. Thus the enumeration approach in 1977 was different from that of 1980 and 1990.

According to the Economic Census of 1977 in Meghalaya, there were 5049 establishments with 21,957 workers, while in 1980 there were 16,908 establishment with 82,535 workers and in 1990 there were 26,235 establishments with 1,23,762 workers. Thus the increase in the number of establishments from 1977 to 1980 was 11,859 (234.88 per cent) and of 1990 over 1980 was 9327 (55.16 per cent). The shares of establishments in rural areas to total number of establishments in 1977, 1980 and 1990 Economic Censuses were 60.86 per cent, 68.71 per cent and 62.95 per cent respectively. The share of the rural areas in the number of total persons usually working and hired workers in the State was 58.48 per cent and 46.23 per cent respectively in 1977 Economic Census, whereas in 1980 Economic Census the percentage shares were 39.79 per cent and 39.21 per cent and in 1990 the similar shares were worked out to 44.49 per cent and 43.27 per cent.

The number of enterprises owned by Scheduled Tribe and Scheduled Caste increased by 73.57 per cent and 90.37 per cent respectively. from 1977 Economic Census to 1980 Economic Census, while the 1990 Economic Census recorded an increase of ~~588.09~~ per cent and ~~191.00~~ per cent respectively over the corresponding figures of 1980 Economic Census. $\rightarrow 185.28\%$ $\rightarrow 29.88\%$

In the Economic Censuses of 1977, 1980 and 1990, the Proportion of establishments operating seasonally accounted for 3.51 per cent and 1.80 per cent and 1.50 per cent of their respective total establishments. The proportion is in the decreasing trend, whereas the proportion in the case of establishments without premises is on the increase. The rate of establishments operating with power/fuel to their respective totals varies from 13.83 per cent in Economic Census 1980 to ~~28.07~~ per cent in 1990, $\rightarrow 23.66$

CHAPTER III

Chapter III deals with the special characteristics of Agricultural Enterprises. Agricultural Enterprises included Livestock Production, Agricultural Services, Hunting, Trapping and Game propagation, Forestry and Logging and Fishing but did not cover crop production and Plantations. This chapter highlights the important findings of the Third Economic Census such as the number of own account enterprises and establishments their total employment by size class at State level, rural, urban, combined, hired workers in relation the total persons employed. Principal characteristics such as seasonality ownership, social group of owner, power/fuel used etc.

TABLE: 1.8

Principal Characteristics of Agricultural Enterprises

Number of Enterprises and Total Persons Employed in Agricultural Own-Account Enterprises and Agricultural Establishments.

District	Sector	No. of Enterprise			Persons employed

STATE		1300	962	2262	2681	3365	6046

Table 1.8: Principal characteristics of Agricultural

Enterprises:

It may be seen from the table 1.8 that according to the results of Economic Census 1990, there were 2262 Agricultural Enterprises providing employment to 6,046 persons in the State. Of these 1,300 (57.47 per cent) were own account enterprises and 962 (42.53 per cent) were establishments. Out of 2262 Agricultural Enterprises 1,901 (84.04 per cent) were in Rural area and only 361 (15.96 per cent) were in Urban area. The number of Own-Account enterprises in Rural area ranges from 33 (2.54 per cent) in Jaintia Hills District to 563 (43.31 per cent) in East Khasi Hills District. Similarly in the case of establishments the lowest number of establishments is reported in Jaintia Hills District with 37 (3.85 per cent) establishments and the highest concentration is in East Khasi Hills with 297 (30.87 per cent) establishments.

TABLE: 1.9

Number of Agricultural Establishments and Employment in Private Co-operative *vis-a-vis* the Total Establishments/Employment.

Type of Establishment	Agricultural	
	Establishments	Total person usually working
1	2	3
Rural Establishments		
1. All	797	2822
2. Private	740	2314
3. Co-operative	2	11
Urban Establishments		
1. All	165	543
2. Private	155	506
3. Co-operative	00	00
Combined Establishments		
1. All	962	3365
2. Private	895	2820
3. Co-operative	02	11

Table 1.9: Table 1.9 shows that out of 962 Agricultural Establishments in the State there were only 2 Co-operative establishments with 11 workers and 895 were the private establishments employing about 2,820 persons. It may be seen from the table that the maximum number of private establishments: 740 (82.68 per cent) were in Rural area and only 155 (17.32 per cent) were in the Urban area.

TABLE—1.10

Number of Agricultural Own-Account Enterprises by Size Class of the Total Employment.

Employment Size Class	Own—Account Enterprises					
	Rural		Urban		Combined	
	Number	Percentage	Number	Percentage	Number	Percentage
1	2	3	4	5	6	7
1	489	44	78	40	567	44
2	336	30	76	39	412	32
3	136	12	30	15	166	13
4	74	7	4	2	78	6
5	29	3	4	2	33	2
6 — 9	38	4	3	2	41	3
10 or more	2	0	1	0	3	0
All Classes	1104	100	196	100	1300	100

Table 1.10—The highest number of Agricultural Own-Account Enterprises as seen in the table 1.10 was in the employment size class of 1 person, constituting 489 (86.24 per cent) in Rural area and only 78 enterprises (13.76 per cent) in Urban area, followed by the number of enterpriser with employment size class of two persons both in Rural and Urban area. Taken together, the size classes of 1 and 2 constituted about 74 per cent of the Own-Account enterprises in Rural area and 78 per cent in Urban area. Thus only about one fourths of the remaining enterprises were distributed in the other size classes. Enterprises with employment size class of 10 or more were very few both in Rural as well as in Urban areas. It may be seen from the table that both Own-Account Agricultural Enterprises decreased with the increase in the employment size class.

TABLE-1.11

All Classes	797	100	165	100	962	100

Table 1.11—Table 1.11 shows the number of Agricultural establishments by size class of total employment. Looking at the importance of the table; it is seen that the number of establishments decreases with increase in the employment size class. Establishments in employment size class of 1-2 constituted about 43.97 per cent of the total establishments in the State. Establishments in employment size class of 1-5 persons accounted for 87.83 per cent of the total establishments in the rural area and the corresponding percentage in urban area was 92.73 per cent. The numbers of establishments in the employment size class of 20 or more persons were very few and no establishments were reported in the employment size classes of 100-199 persons and above.

TABLE 1.12
Enterprises with Selected Characteristics in respect of Own-Account Enterprises by Size Class of Total Employment.

10 or more	3	0	0	1	0	3
All Classes	1300	99	237	749	83	1245

Table 1.12 : From table 1.12 above, it has been found that out of 1,300 Agricultural Own-Account enterprises, 567 (43.61 per cent) were reported in the employment size class of 1 person. But on the total of 567,411 (72.48 per cent) were owned by Scheduled Tribe and 17 (3 percent) by Scheduled Caste only 72 (12.70 per cent) were seasonal in nature and 539 (95.06 per cent) were not using power/fuel. Enterprises falling in employment size class of 2 persons were 412 (31.69 per cent) of the total enterprises in the State. Of this 396 (96.12 per cent) were not using power/fuel. There were very few enterprises in employment size class of 10 or more. Of the total 1300 Own-Account enterprises only 99 (7.61 per cent) were seasonal in nature and 237 (18.23 per cent) were operating without premises. 749 (57.61 per cent) were owned by Scheduled Tribes and 83 (63 per cent, by Scheduled Caste-1245 (95.77 per cent) were not using power/fuel. It is of significance that 95.77 per cent of the total Own-Account enterprises in the State are falling in one or the other of the selected characteristic

Table 1.13—Table 1.13 shows the distribution of Agricultural Establishments with selected characteristics by size class of total employment. From the view point of the various characteristics, the highest concentration of establishments was in the employment size class of 1-2 persons which accounted for about 43.97 per cent of the total Agricultural establishments in the State. From the table it has been found that establishments operating seasonally varied from 40.8 per cent to 2.04 per cent in the various size classes while in the highest size classes, the establishments operating seasonally were not reported.

The proportion of establishments run by private accounted for about 93 per cent of the total establishment. The proportion in the higher employment size groups was smaller with the exception of size groups 50—99 which contained only one establishment. There were only two establishments run by co-operatives, one in the size class of 1—2 and the other in the size class of 10—14 persons.

The proportion of establishments owned by Scheduled Tribe and Scheduled Caste worked out to about 49 per cent and 13 per cent respectively of the total establishments.

TABLE : 1.14

Hired Worker in Relation to Total Persons Employed in Agricultural Establishment by District

District	Total Person usually working		Hired Workers	
	Number	Percent	Number	Percent
1	2	3	4	5
Jaintia Hills	140	4	102	5
East Khasi Hills	1557	46	1055	51
West Khasi Hills	251	8	171	8
East Garo Hills	482	14	244	11
West Garo Hills	935	28	514	25
STATE	3365	100	2086	100

Table 1.14 : Table 1.14 revealed the proportion of hired workers to total persons employed in the Agricultural establishments by districts. As observed in table 1.8, East Khasi Hills District contained the highest number of establishments with 428 (44.49 per cent) of the total Agricultural establishments in the State, provided employment to 1557 workers out of which 1055 (67.76 per cent) were hired workers followed by West Garo Hills District with the total of 935 workers of which 514 (54.97 per cent) were hired workers and East Garo Hills with the corresponding figures of 482 and 244 (50.62 per cent) respectively. As observed in the table, Jaintia Hills District which has the lowest number of establishments compared to other districts was employing only 140 persons of which 102 (72.86 per cent) were hired workers.

TABLE : 1.15

Selected Characteristics of Agricultural Enterprises in Rural and Urban Areas and Combined

Items	Numbers of Own-Account Enterprises			Number of Establishments		
	Rural	Urban	Total	Rural	Urban	Total
1	2	3	4	5	6	7
1. Seasonally	91	8	99	48	1	49
2. Without Premises	219	18	237	88	8	96
3. Without Power/Fuel	1058	187	1245	772	144	916
4. Under Social Group of Ownership						
(a) Scheduled Tribes	700	49	749	411	62	473
(b) Scheduled Castes	74	9	83	118	4	122
5. Total No. of Enterprises	1104	196	1300	797	165	962

Table 1.15 : Table 1.15 presents the selected characteristics of Agricultural Own-Account enterprises/establishments in Rural/Urban and Combined. From the table, it can be seen that 7.61 per cent of the Own Account enterprises were seasonal in nature, while in the case of establishments it is 5.09 per cent. Out of 99 seasonal own-account enterprises 92 per cent were in Rural and 7 per cent were in Urban area, while in the case of establishments 98 per cent were in Rural areas and 2 per cent were in Urban areas.

Out of 1,300 Agricultural Own-Account enterprises in the State, 237 (18.23 per cent) were operating without premises, of these 92.41 per cent were in Rural area and 7.6 per cent were in Urban area. In the case of establishments, 96 or 9.98 per cent operated without premises, of which, 91.67 per cent were in Rural area and 8.33 per cent in Urban area.

The majority of Own-Account enterprises and establishments were operating without power/fuel and constituted for 95.77 per cent and 95.23 per cent respectively against their corresponding total numbers ; of these 84.98 per cent of the former were in Rural areas and 15.02 per cent in Urban areas and in the case of establishments, the corresponding percentages are 84.28 per cent and 15.72 per cent in Rural and Urban areas respectively.

The Own-Account enterprises and establishments owned by Scheduled Tribes accounted for 57.61 per cent and 49.17 per cent of the total numbers respectively and the corresponding share of Scheduled Castes worked out at 6.38 per cent and 12.68 per cent respectively.

TABLE—1.16.

Particulars of Agricultural Private and Co-operative Establishment and their Selected Characteristics

	No. of Establishments							
	Rural	Urban	Total	Seasonal	With out Pre-mises	Without Power/Fuel	Type of	Ownership
	2	3	4	5	6	7	S. T.	S. C.
1	2	3	4	5	6	7	8	9
1. Co-operative	2	0	2	0	1	0	0	0
2. Private	740	155	895	37	94	35	473	122

Table 1.16—From the table 1.16 it is noticed that out of 895 Agricultural private establishments, 740 are in the Rural areas. Establishments owned by Scheduled Tribes and Scheduled Castes constituted for 51.85 percent and 13.63 percent respectively of the total numbers respectively.

Out of the total establishments, Scheduled Tribes and Scheduled Castes Ownership constituted for 52.85 percent and 13.63 percent respectively, only 4.13 percent are seasonal in nature, those operating without premises accounted for 10.50 percent and 3.91 percent are not using power/fuel. There are only two Agricultural Go-operative establishments, both of which are in Rural areas; and are perennial in nature; they are operating with the help of power and one of them operated without premises.

CHAPTER—IV

Principal Characteristics of Non-Agricultural Establishments

The Economic Census, 1990, has brought out a great deal of data on enterprises classified under Agricultural Enterprises (excluding Agricultural production and plantation) and Non-Agricultural enterprises. The information of enterprises with their characteristics such as a data on employment, employment size class, nature of operation of own-account enterprises and establishments; ownership of enterprises etc., were presented in various tables specifically designed for easy understanding and identification.

The following tables deal with various information relating to Non-Agricultural enterprises.

TABLE : 1.17

Inter-District Comparison of Non-Agricultural Own-Account Enterprises and Establishments, All Activities, Rural, Urban and Total.

	No. of Own-Account Enterprises			No. of Establishments			Combined		
	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	Total
1	2	3	4	5	6	7	8	9	10
Jaintia Hills	2068	730	2798	3024	670	3694	5092	1400	6492

East Garo Hills	1295	339	1634	2159	424	2583	3454	763	4217
West Garo Hills	3292	787	4039	3904	1817	5721	7156	2604	9760
STATE	13761	7713	21474	16517	9718	26235	30278	17431	47709

Table 1.17: Table 1.17 shows the inter-district comparison of Non-Agricultural Own-Account enterprises and establishments-all activities-rural, urban and total. There were 45709 Non-Agricultural enterprises in the State. Of these 21,474 (45.01 percent) were own-Account enterprises and 26,235 (54.98 percent) were the establishments. The concentration of both own-Account enterprises and establishments in rural areas were (64.08 percent) and 63 per cent of their respective total number and the rest were in urban area.

As regard the inter district comparison, the highest concentration of enterprises were in East Khasi Hills district with 10,532 (49.04 percent) own account enterprises and 11,098 (42.30 percent) establishments followed by West Garo Hills with 4,039 (18.81 percent) own-account enterprises and 5,721 (21.81 percent) establishments. In other Districts, the number of own account enterprises ranged from 1,634 (7.61 percent) in East Garo Hills to 2,798 (13.03 percent) in Jaintia Hills district. Similarly the number of establishments varied from 2,583 (9.84 percent) in East Garo Hills district to 3,694 (14.08 percent) in Jaintia Hills district.

TABLE: 1.18

Table 1.18 :—Table 1.18 indicates that out of 26,235 Non-Agricultural establishments in the State the majority of such establishments with 49.81% are in the employment size classes of 1-2 persons. Again East Khasi Hills ranks first in the number of establishments in all employment size classes except in the employment size class of 50-99 overtaken by Jaintia Hills District. West Garo Hills District occupied the 2nd position in all other employment size classes. Again, except in the employment size classes of 1-2 persons overtaken by West Khasi Hills and in the size classes of 3 20-24, 55-90 by West Garo Hills. Jaintia Hills District occupied the 3rd rank. The shares of East Khasi Hills, West Garo Hills and Jaintia Hills Districts in all employment size classes are high compared to other two districts of the State which come into existence much later.

Table 1.19:—Table 1.19 shows the inter-district comparison of own account enterprises by size class of employment in rural, urban as well as combined. As could be expected, the majority of the own account enterprises are concentrated in the employment size class of 1 person. This is true in both the cases of rural as well as of urban areas and in all the districts. Further, it is observed as usual, the number of enterprises decreases with the increase in the employment size class in all the districts.

Except in the size class of 10 or more persons overtaken by East Garo Hills in rural areas, all other size classes, East Khasi Hills district ranks first in the number of own account enterprises both in rural as well as in urban areas. Again except for each of the size classes 5, 6—9 and 10 or more in rural and urban and combined overtaken by East Garo Hills, West Garo Hills ranks second in the number of enterprises.

Table 1.20 : The distribution of the hired workers in relation to total persons employed in Non-Agricultural activities is given in table 1.20. From the table it is seen that the percentage of hired workers to total persons usually working in their respective activities of the non-agricultural establishments, ranges from 30 per cent in retail trade to 100 per cent in Electricity, Gas and water supply. The proportion of hired workers in establishments falling under the activity of wholesale trade considered as bigger establishments works out to 71 per cent while in retail trade considered as smaller establishments it came to 30 per cent only of their respective total working force. While the proportion of hired workers to total working force in establishments works out to 100 per cent in Electricity, Gas and Water Supply, 99 per cent in Communication, 96 per cent in Finance and Insurance and 88 per cent in Community Social and Personal Services.

TABLE : 1.21

Hired Workers in Relation to Total Persons Employed in Non-Agricultural Enterprises by District—All Activities

	State ...	163930	124400	39530	116023	91407	24616

Table 1.21 : The proportion of hired workers in relation to total persons employed in Non-Agricultural establishments by districts is given in table 1.21. In the State there were 26 235 Non-Agricultural establishments providing employment to 1,63,930 persons, out of which 1,24,400 (75.89 per cent) were males and 39,530 (24.11 per cent) were females. Out of 1,24,400 male workers, 91,407 (73.48 per cent) were hired workers; again of 39,530 female workers, 24,616 (62.27 per cent) were hired workers.

East Khasi Hills District with the highest number of establishment constituted the highest proportion of worker with 53.61 per cent of the total workers employed in all the Non-Agricultural establishment, in the State, followed by West Garo Hills district with 17.50 per cent. The highest share of female employment the total working force of the district, works out to 31.73 per cent in West Khasi Hills, followed by Jaintia Hills district with 30.03 per cent. Out of 4522 female working force in West Garo Hills district, 69.01 per cent represents the hired female workers, which is the highest ratio compared to other districts in the State. In other districts the ratio ranges from 50 to 61 per cent.

TABLE: 1.22

Women Employment in Non-agricultural Enterprises by Major Activity Group at State Level

Sl. No.	Major Activity Group	Person usually working		Hired Workers	
		Total	Female	Total	Female

All Activities		163930	39530	116023	24616

Table 1.22: Table 1.22 shows the position of women employment in major activity at State Level. From the above table it is seen that the highest proportion of female employment to total working force has been reported in Restaurants and Hotels with 43.03 per cent followed by Retail Trade with 28.95 per cent. Taking together all the activities, the proportion of female employment to total working force comes to 24.11 per cent.

Out of 39,530 females workers reported in all activities in the State, 24,616 (62.27 per cent) were female hired workers. Out of 17,053 female workers usually working covered by community social and personal services, 17,727 per cent were hired workers, followed by construction with 80.70 per cent and Mining and Quarrying with 78.17 per cent. The proportion of female hired workers to total female working force is more in the major activity which contains public enterprises and less in the major activity which contains private enterprises.

Table 1.23:—Table 1.23 shows the women employment in all activities, rural urban and combined by districts. Out of 79,469 persons usually working in the rural area in the State, 20,669 (26.01 per cent) were females. In urban area the percentage of women employment come to 22.33 per cent. Again out of 50,212 total hired workers in rural area and 65,811 in urban area, the number of females were 10,775 (21.45 per cent) and 13,841 (21.03 per cent) respectively. Out of 20,669 female working force in rural area of the State 10,775 (52.13 per cent) were female hired workers in urban area out of 18,861, the number of female hired workers was 13,841 (73.38 per cent). The highest number of female employment was reported in East Khasi Hills with 22,028 (25.06 percent) of the total working force in rural and urban combined and of which, 14,006 (63.58 percent) were hired workers. Further it is found, that the proportion of female workers in the total working force in each district, the lowest being in West Garo Hills which shared only 15.76 per cent and of which, 69.04 per cent were hired workers.

Table 1.24 shows the number of own-account enterprises (non-agricultural) separately for rural and urban by size-class of the total employment. As reported earlier, of the total own-account enterprises, as large as 44.13 per cent in rural area and 26.77 per cent in urban area fall in the employment size-class of 1 person. The corresponding figures in the employment size-class of 2 persons are 15.19 per cent in rural area and 7.64 per cent in urban area. Very few enterprises are having employment size-class of 10 or more persons.

Out of 15,226 own-account non-agricultural enterprises covered by the employment size-class of 1, 62.24 per cent are in rural area and 37.76 per cent are in urban area. Similarly for all the other size-classes, the proportion of enterprises in rural area is higher than in the urban area, and in the State, the share of the number of enterprises in rural area works out to 64.08 per cent while in urban area it is 35.92 per cent only.

TABLE 1.25 : The distribution of the Lumber of establishment by size class of the total employment revealed that the majority of the establishment falls in the employment size class of 1 to 2 persons. The number of establishments covered by the size class of 1-5 persons accounted for 87 per cent of total establishments in rural area and 77 per cent of total establishments in urban area. Thus only 13 per cent of the total establishments in rural area and 23 per cent in urban area are distributed in the different employment size classes of 6 or more persons. It is of significance that the proportion of establishments covered by each of the employment size classes of 1-2 upto 6-9 is higher in rural area, while the proportion of employment size groups of 10-14 and above is found to be higher in urban area.

Table 126: From the table 1.26, it can be seen that the concentration of own-account non-agricultural enterprises falling under the employment size classes of 1, 2 and 3 persons are highest in the retail trade sector constituted for 59.88 per cent, 52.99 per cent and 37.66 per cent of their respective aggregates; while restaurant and hotels with 37.96 per cent and 35.92 per cent of the total enterprises in the size classes of 4 and 6-9 persons respectively, took the lead. It is also observed that the community, social and personal services sector, with 73.07 per cent of the total number of enterprises, ranked first in the employment size class of 10 or more persons, while simultaneously co-shared the first position with restaurants and hotels sector in the employment size class of 5 persons, sharing 33.96 per cent of the total enterprises each.

Further, the enterprises falling in the employment size classes of 1 and 2 persons constituted for 93.75 per cent of the overall enterprises and the remaining 6.25 per cent are distributed in the other employment size classes. Important sectors of the economy such as mining and quarrying construction, transport, etc. falling under the size class of 10 or more persons reported nil enterprises, which again comparatively, accounted for very less enterprises.

Table 1:27: With the exception of employment size class of 6-9 that is the number of establishments falling under the sectors of (a) mining and quarrying, (b) construction, (c) finance, insurance, real estate and business services, the employment size classes of 1-2 persons occupied the first position in all employment size classes, and accounted for about 49.81 per cent of the total non-agricultural establishments in the State. It is interesting to note that community, social and personal services sector has the highest numbers of establishments in all the employment size classes. The numbers of establishments falling under the employment size groups of 100-199 persons and above are comparatively very low.

TABLE : 1. 28

Distribution of Non-Agricultural Own-account Enterprise with Selected Characteristics by Employment Size Class

10 or more ...	26	1	2	4	1	23
All classes ...	21474	675	4736	14207	669	18058

Table 1.28 reveals the distribution of non-agricultural own-account enterprises with selected characteristics. There are 15,226 enterprises with failing under the size-class of 1, which accounted for about 71 per cent of the total numbers of enterprises.

Of these 515 (33% per cent) were seasonal, 3,953 (25.96 per cent) were operating without-premises, 9,949 (65.34 per cent) were owned by Scheduled Tribe, 508 (3.34 per cent) by Scheduled Caste, 13,684 (89.87 per cent) were operating without power/fuel. As stated earlier the number of enterprises with selected characteristics decreases with the increase in the employment size-class. The employment size-class of 10 or more contained the smallest number of enterprises when compared to the respective shares of other employment size-class.

It is of significance that out of 21,474 non-agricultural own-account enterprises, 3.14 per cent are Seasonal enterprises, 22.05 per cent are operating without premises, 66.16 per cent are owned by Scheduled Tribe and 3.11 per cent by Scheduled Caste and 84.09 per cent are operating without power/fuel.

14.	All Classes	26235	395	3717	19083	195	10062	539	20028

Table 1.29 shows the selected characteristics of non-agricultural establishments by major activity groups. There were 26,235 non-agricultural establishments in the State, of these 395 (1.50 percent) only were seasonal, 3,717 (14.17 percent) were operating without premises. The majority of establishments numbering about 19,083 (72.74 percent) were owned by private. Out of the total establishments 10,062 (38.35 percent) belonged to Scheduled Tribes and 539 (2.05 percent) to Scheduled Castes. As large as 20,028 (76.34 percent) establishments were operating without power/fuel.

The highest number of establishments numbering 11,395 (43.43 percent) were found in Community, social and personal services followed by retail trade 5,109 (19.47 percent).

CHAPTER V

SUMMARY OF RESULTS

The Census is a fairly sound system of data collection for building up some information required for sound planning of developmental Programmes. The Third Economic Census in Meghalaya was conducted during May '90 to July '90 along with the house listing operations of the population census 1991. The Central Statistical Organisation in cooperation with the Directorate of Economics and Statistics were responsible for the planning and technical guidance of the economic census operations. The Registrar General and the Census Commissioner of India and the State Directors of Census Operations were responsible for the organisation and coordination of field operations.

5.2. The first economic census was conducted in 1973, the second in 1980 and the third in 1990. The main aim of the economic census was to provide a frame for various socio-economic enquiries and follow up surveys. During the third economic census, complete enumeration on entrepreneurial activities other than crop production and plantation in the whole State was carried out. The census provided the information on the distribution of enterprises, their location, nature of operation, type of ownership, social group of owner, power/fuel used for the activities, number of persons usually working daily in the enterprise etc.

AGRICULTURAL ENTERPRISES

5.3. There were 2,262 agricultural enterprises. Of this 1,300 (57.47%) were own-account enterprises and 962 (42.53%) were establishments. Out of 2262 agricultural enterprises, 1,901 (84.04%) were in rural areas and the rest 361 (15.96%) were in urban areas. 2,262 numbers of agricultural enterprises provided employment to about 6,346 persons. Average number of persons working per enterprise worked out to 2.64% in rural area and 2.57% in urban area.

NON-AGRICULTURAL ENTERPRISES

5.4. There were 47,769 non-agricultural enterprises in the State of which 30,278 (63.46%) were in rural areas and 17,431 (36.54%) were in urban areas. There were 79,469 persons usually working in non-agricultural enterprises located in rural areas, out of which 50,212 (63.18%) were hired workers. Average number of workers per enterprise in rural areas worked out to 2.62. In urban areas Non-Agricultural enterprises provided employment to about 84,461 workers, of which 65,811 (77.92%) were hired workers. ~~to about 84,461 workers, of which 65,811 (77.92%) were hired workers~~ Average number of workers per enterprise in urban areas worked out to 4.14.

HIGH LIGHTS OF ECONOMIC ACTIVITIES IN THE STATE

5.5. The State of Meghalaya is a hilly region with difficult terrains that greatly inhibited the economic progress of the area. Agriculture is the mainstay of the people of the State. Agriculture proper contributes to about 20% of the State income, the area that is used for cultivation is less than 10% of the geographical area of the State. There is much scope for extension of area under cultivation.

5.6 Agricultural enterprises (live-stock production, Agricultural services, forestry and logging and fishing) with 2,262 enterprises engaging 6,046 man-power contributed only a small percentage to the State income.

5.7 As regards non-agricultural activities which contributed the highest percentage of more than 70% to the State income, community, social and personal services formed the major employer of the State engaging 74,265 workers in 15,341 enterprises accounting to about one-sixths of the income of the State. Construction accounts to about 14% of the State Domestic Product, this is which is the only transport link within the State as well as to the rest of the country. It has 1,397 enterprises and about 67% of the total construction enterprises are the establishments providing employment to about 7,862 workers.

5.8 Trade, hotels and restaurants occupies the fourth position in the economic activities with 23,694 enterprises providing employment to about 50,327 workers. This sector contributes to about 10% of the income of the State. This sector constitutes more enterprises than community, social and personal services but engages less number of workers and most of them are own-account enterprises.

5.9 Besides, the above activities, Transport, Storage and communication, Mining and Quarries, Manufacturing, real estate, ownership of dwelling and business services form the important activities in the State.
