

**REPORT
ON THE
SIXTH ECONOMIC CENSUS
MEGHALAYA
(DIRECTORY OF ESTABLISHMENTS)**

**GOVERNMENT OF MEGHALAYA
DIRECTORATE OF ECONOMICS & STATISTICS
SHILLONG**

PREFACE

The Sixth Economic Census was conducted in Meghalaya during June, 2013 to October, 2013 in collaboration with the Central Statistical Office (CSO), Ministry of Statistics and Programme Implementation, Government of India. The Final Report of this Census containing figures relating to number of establishments and their employment, cross classified according to location, major activity groups, type, etc. both in the organised and unorganised sectors of the State have been published.

The "Address Slip" which was first introduced during the Fifth Economic Census for collecting certain information on the Address of the establishment having 10 or more workers(hired or non-hired) was modified and renamed as "Directory of Establishment Schedule (6C)" in Sixth Economic Census for establishments having 8 or more workers (hired or non-hired), thus "**Directory of Establishments**" contained the addresses of the establishments employing 8 or more workers (both hired and non-hired) engaged in various economic activities (excluding those engaged in crop production, plantation, public administration, defence and compulsory social security) which were compiled and published for further follow-up surveys.

To improve the quality of data and to avoid possible errors in transcription, Ministry of Statistics and Programme Implementation, New Delhi have provided the Data Entry Application Software for which data entry of the **Schedule 6C** (a Schedule during 6th Economic Census used for collecting information of the establishments employing 8 or more workers) was done at the District level. The data received from the Districts were then scrutinised, errors were corrected to the detailed extent possible and consolidated at Directorate's level for finalisation of the Report.

I hope that this Directory will be of immense use to policy makers, planners, researchers and to the data users as it provides basic information about the distribution of establishments in the State.

(D. L. Wankhar, I.E.S)
